Innovate or Die

GOD's recent gift to man is without a single patent as He led man to experiment-innovate-research till the internet (as a mere "toy") was developed, but from the core protocol to sloppy software, it is still riddled with flaws.

GOD's new internet will be developed by highly skilled Jn14 level types who hear and obey His voice to write flawless code, to design [Hydra-like hardware](#), as He led [Joseph \(Imhotep\) in Egypt](#), enabling a secure tool **be hacker and virus proof.**

GOD's [qualified work-force](#) only will have access to His new internet, thus ensuring maximum security for global institutional leasing, so eliminating the current loss of \$ billions, the loss of data, the loss of productivity that the "toy" produces.

in Christ's love,
Robert Bristow

Responsible Software - Secure Code

GOD is increasingly exposing flawed software and in particular He is forcing manufacturers to produce responsible, secure code, as in Boeing aircraft, for all computer applications-services.

GOD's free-market principles will expose and dispose of greed, sloth and waste in His participating companies to manifest His virtues thru His marketplace rule to affect all mankind.

GOD's secure system will include a superior, CCCInc. operated web with flawless protocol, to ensure secure data flow-storage, enabling CCCInc. and clients 100% secure business operations.

GOD will use Jn14 level Bible believers min., to ensure only qualified operators have access to the CCCInc. web to optimise security, so avoiding human sabotage, theft, etc., all to eliminate the waste of \$ billions.

*Managing and Marketing
Efficiency Technologies*

**GOD is showing us
the corruption, negligence, waste
in the IT marketplace by failing to install Hydra.**

**2005 worst year
for breaches of computer security**

At least 130 reported breaches have exposed more than 55 million Americans to potential ID theft this year. Security experts warn that wayward personal data, such as Social Security and credit card numbers, could end up in the hands of criminals and feed a growing problem.

**GOD is showing us
the IT experts have no current plan,
no ongoing strategy to fight the evil cyber crime,
by installing Hydra.**

The onslaught is likely to continue unless corporations reallocate security spending to better identify and block online threats, says Abe Kleinfeld, CEO of computer-security firm nCircle.

Excerpted from USA Today Dec 29, 2005 by Jon Swartz

*Note comments from Paul Kurtz of CSIA
and Andy Purdy of DHS' Nat'l Cyber Security.*

as a result

**the global marketplace is currently satisfied
with corrupted, destructive, inept, irresponsible, sloppy,
100% unprofessional software,**

whereas

**the likes of [Boeing and Motorola](#)
demand flawless (perfect) code for their products
that their products and contingent services operate efficiently,**

else

the planes would be in the ground and the phones useless,

consequently

**[Boeing and Motorola](#) along with their partners
will continue to develop innovative products and services
to maximise new technological applications and marketplace potential,**

to benefit

responsible manufacturers, end-users and corporate ROI,

and bring

GOD Almighty His full praise and glory.

GOD's work-force must be qualified

GOD's qualifying criteria, process, worthiness to grow from [mere mouth](#) believers into anointed-lukewarm-ungodly requires initial obedience, copying the early disciples Jn14 Acts1:8; 2; 5:32; 9 1Jn2:20-27 to attain [true born again level Jn3:7 1Pet1:22,23,](#)

an essential first step to be,

GOD's business management level, [His church e-p-t](#), His service workers (counselors, doctors, nurses, teachers, etc.), thru hearing His voice-His commands *in/thru the Spirit 1Pet1:22 to know and do the truth-the word* in accordance with His true-pure agenda, His plan, His will,

a process of learning-growing
thru the fire Ps66:8-12 Zech13:9 Mal3:3 Lk3:16
Job33 Acts14:22
till
abiding in Him,
to be,

[GOD's business-ministry directors-elders in CCCInc. 7 companies](#)

if they endure Mark13:13 Heb3:6,14.

in Christ's love,
Robert Bristow

INSPIRED

Unless the LORD builds the house,
they labour in vain who build it. Ps127:1

that

**"... this gospel of the kingdom will be preached in
all the world as a witness to all the nations, and
then the end will come." Mat24:14**

therefore

**GOD is fulfilling
His own word, in that,
no Internet patent exists, as it was
developed by gov't, universities, and individuals
as they took concept, into protocol, into data flow, for the
initial, vastly flawed system that must be perfected by GOD's people,
as the LORD works His gift for His gospel and the benefit of humankind globally.**

True Security

Promoting:
 Bodacion
 Technologies'
 Hydra WIPS

Your company needs to offer-promote IT infrastructure that rids the marketplace of planned obsolescence along with ensuring true security for all IT users.

Your company needs to insist all **IT code is flawless, never requiring patches**, so built-produced maintenance free, as Bodacion Technologies' Hydra Web Intrusion Prevention System.

Your company needs to offer customers the world's only hacker-proof, virus-proof, worm-proof WIPS of Hydra to fully secure their networks in space and on earth, to be Responsible.

Your company's long term viability depends upon you sharing efficiency technologies to benefit the world, to eliminate waste, **to turn the internet from a toy into a professional marketplace tool.**

Your company needs to develop a passion to change-innovate.

Looking forward to serving you.

Sincerely,

Alexander Poole
 President

Bodacion Technologies' Hydra is the world's only Hacker-proof, virus-proof, worm-proof, Trojan horse-proof web intrusion prevention system.

Alex,

Negligent Employee, Mar 03, '04

In a discussion with an international network programmer working for B of A, I was made aware of just how easily internal/global systems can be compromised, damaged, destroyed from the inside by corrupted PCs, roaming laptops and negligent to malicious attitudes.

This particular employee continues to use his corrupted PC, despite a cursory Norton check that failed to identify the corruption, also verbally despising and disdaining the B of A's internal security.

Robert, *CEO*

**Current IT marketplace negligence
 requires speedy innovation to
 avoid class action suits.**
