

## **GOD's Fair Trade**

**practices thru global co-operatives will utilize  
conventional techniques, conventional land use + rotation,  
thus returning to responsible resource principles for quality commodities.**

---

**GOD is benefiting farmers who meet the challenge  
and return to conventional-old fashioned practices for the  
production of a variety of "organic" foods, healthy-natural food.**

**One example is: nationally, the number of organic dairy cows has jumped  
from about 13,000 in 1997 to nearly 49,000 in 2001. A Vermont organic  
farmer helps others get started and most "try it for the money, and then six  
months later, they say they'd never do it any other way".**
